

URETEK™

Concrete Lifting and Soil Stabilization

***“Very professional,
clean, and responsible.”***

- McCormick, Inc.

Why **URETEK**™

Quick, clean, long-lasting concrete raising and soil stabilization solutions put asset owners in control of their commercial and industrial assets.

\$ Increase Asset Value

Designed for speed, longevity.

URETEK quickly corrects problematic concrete and soil concerns, giving you short and long-term control of the commercial or industrial facility.

Little to No Down Time

Adding to the bottom line by saving time.

URETEK's concrete raising procedure keeps your operation functioning at maximum efficiency, giving you bottom line control with satisfied tenants.

↓ Reduce Liability and Losses

Concrete maintenance a key to success.

Reduce liability, business risk, and personal injury claims from trip hazards, vehicle hazards, water main washouts, and loss of merchandise.

♻️ Eco-Friendly Procedure

Going beyond just concrete and soil repair.

Formulated to meet or exceed environmental requirements, our proprietary material is NSF 61 certified and is made with rapid renewable resources.

Live safer.™

✓ No Disruption

Low dust, low impact process.

URETEK's minimal dust, low noise, and equipment rarely require tenant relocation or removal of sensitive electronics, and reduces airborne allergens that may affect occupants.

Your **SUCCESS**

With over 85,000 successful projects worldwide, more than two decades of experience, and proven materials, you control your success.

✓ Strength in Minutes, Not Days

90% strength in 30 minutes or less.

URETEK's remarkable speed and accuracy gives client control over their commercial or industrial asset, with little or no disruption to tenants or commerce. 24-Hour businesses continue to operate during and immediately after the repair is completed.

✓ The Most Experience

85,000 projects and counting.

As industry inventor and pioneer, our URETEK affiliates bring over two decades of experience and knowledge providing our clients with the best solution to your concrete and soil concerns.

✓ Maximize Load Bearing Capacity

Safely restore structure integrity.

Substantial increases of soil load bearing capacity is immediate, effective, and verifiable. Control your structural stability with the added assurance and confidence of URETEK's highly trained operators.

✓ Lifts of Over 125 Tons

Controllable, lightweight, and powerful polymer.

With a track record of structural lifts in excess of 100 tons, URETEK's patented polymers are ready for the heaviest structural loads. Lightweight yet powerful, URETEK puts you in control of your commercial and industrial assets.

“Very knowledgeable... experience was key to getting the job.”

BMS Management (TN)

Your **SOLUTIONS**

- ✓ Foundation Repair**
